351 FOURTH AVENUE, NEW YORK CITY.

TERMS USED TO DEFINE THE VARIOUS PARTS OF A COIN.

The front or face of a coin bearing the principal device, is called the obverse. *Obv.*

The back is called the reverse. *Rev.*

The principal device or object represented on a coin is called the type.

The area or space between the type and the circumference is called the field.

The lower portion of the area of a coin beneath the type, and separated from the rest of the field by a horizontal line, is called the exergue. *Ex.* The line itself is sometimes called the socle.

Small objects represented either in the field or the exergue, as adjuncts to the main type, are called symbols.

Portions of a coin which are sunk below the level of the surface are said to be incuse.

The words *surrounding* the device form the legend; if arranged to read in lines *across* a coin or medal, they are called the inscription.

IMPOSITIONS.

Counterfeits are of three classes: (1) Struck copies from dies imitating the original. (2) Electrotypes. (3) Casts (the moulding process). An altered date on a piece, otherwise genuine, may properly be also classed with the preceding.

Restrikes are impressions from the original dies, but struck subsequently; and although from such original dies, should not be classed with *original issues*: in certain well-known cases, they have been fur- tively put on the market, to the detriment of owners of rare originals, and with a willful disregard of their rights, which might almost be called robbery, since the owners, even if conscious, are helpless. Restrikes are close relations to the foregoing class, and should not be encouraged. Medals struck at the Paris mint since 1842 have the name of the metal inscribed on the edge, often with a symbol by which the date of restrike can be approximately known. Therefore issues subsequent to that date are easily determined, whether original or modern.

- 8 173 1799, 1800, '01, '04, and later. Christ's Church Penny (2 die var.). Cockatoo, lion and dog, etc. Halfpennies, 28, and Farthings, 11, including Beaver and Wanderow. Good to fine. Three holed, probably as issued. 31

Just a word as to value; I copy from the Scott Stamp & Coin Co.'s auction sale, April 6, 1896, when I wrote as follows:

"For the information of collectors as to the commercial value of these tokens, we will state that we have kept a careful record of the prices asked for them by reputable dealers in London, and elsewhere in Great Britain. Few are marked as low as 8 shillings (\$2.00), while many are rated from 12 to 18 shillings. We have had several transactions for the obtaining of single specimens of either Penny, Halfpenny or Farthing, where the price has been from £1 to £2. We quote from an invoice of 1892, 9 at 15 sh., 9 at 16 sh., 4 at 17..6, 4 at £1..1, 3 at £1..5 and 3 at £1..10, making 32 pieces, averaging \$4.50 each."

HISTORICAL JETONS OF HOLLAND.

16th and 17th centuries; dates from about 1559 to 1698. All are numbered according to Dugnoille's work, entitled "*Le Jeton Historique des Dix-Sept Provinces des Pays-Bas.*" Brussels, 1876-80. A circular ticket is beneath each piece, and in most instances the subject of its issue is given in English. The condition for the greater part is very fine. It is believed the collection is free from duplicates.

THE AMERICAN COINS

COLLECTED BY

HERR GEORG F. ULEX,

Of Hamburg, Germany.

The beginning was made many years ago, while he was a resident here. There are rareties in nearly all of the series represented, and it is especially rich in Colonials, Territorial Gold, Half Cents, Uncirculated and Proof Coins, and Patterns.

A CATALOGUE of this sale, with prices realized, marked in red ink, will be mailed for 40c., prepaid.

A study of the prices at which coins and medals are selling cannot fail to make bidding more satisfactory. The cost is but a trifle, and a knowledge is thus rapidly acquired by comparison of the different sales, enabling the bidder to make offers which will enhance his chance of obtaining what is desired.
